Applications

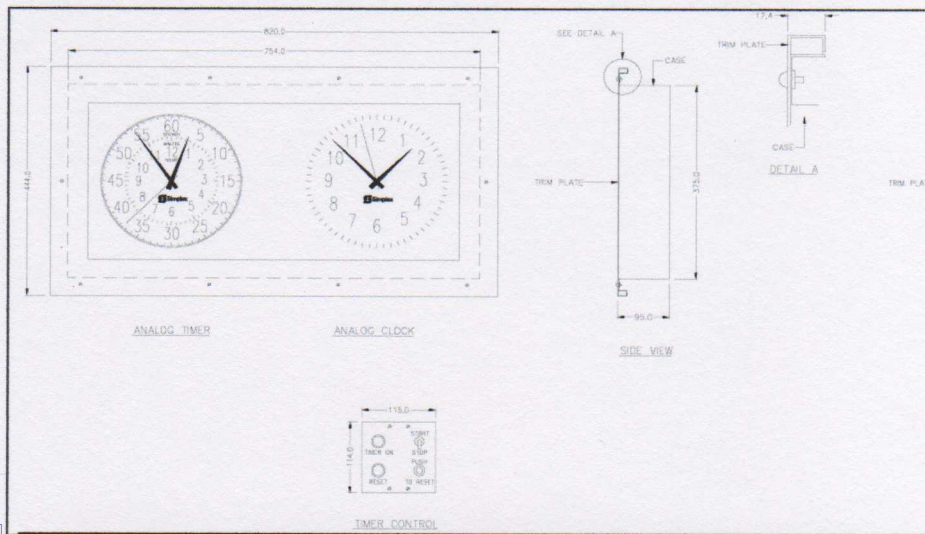

Simplex model 6311 theatre times are for use in hospitals delivery rooms, operating rooms, laboratories, schools and industrial applications. The dual theatre time is designed to keep track of vital timed events throughout an operating by providing surgeons and support staff with both interval time and accurate referenced and "real time" via Simplex 0057 series slave clock. This system is housed within an "air tight" sealed stainless steel cabinet complete with shatterproof acrylic enclosure.

Operation

Manual operation from 6311-9502 timer control is started by switch activation (START), which is indicated by the red timer-on LED. If the timing sequence must be stopped, the STOP position will instantly stop the hands without coasting due to a "dead stop" motor control feature. Reset is activated by push-button, if the control switch is in the STOP/RESET position.

Dual Theatre Timer Features

- Flush Mount - Stainless steel case with shatterproof acrylic lens
- UL listed, interval timer and controller
- 0057 series Sync. Wired clock - 1 & 2 hourly correction facility
